

CoronaVirus Analysis in the month of June

*Strategies for safeguarding the people :*

- ➔ *Sanitizing the containment Zones so that the people who are not infected will be much safer.*
- ➔ *Masks and sanitizers should be distributed for everyone.*
- ➔ *Government needs to support poor people for their food and shelter.*
- ➔ *Closing all crowd places In the state.*
- ➔ *People who are suffering from fever and cold, They need to take Corona Virus test.*
- ➔ *For the patients of coronavirus , Treatment should be free of cost.*
- ➔ *As the cases are increasing daily, more number of beds should be provided in the hospitals.*
- ➔ *Government need to aware the people about the current situation.*
- ➔ *Increasing more number of testing clinics.*
- ➔ *All the citizens in the state must ensure to isolate themselves in their houses.*
- ➔ *Special safety should be issued to the Doctors , Police and social workers.*
- ➔ *Government must ensure that every citizen in the state is healthy.*

*==> The Infant Mortality Rate(IFR) and Crude Mortality Rate(CMR) as follows :*

*On 1st of June , IFR = 2.3835 And CMR = 0.0015.*

*On 30th of June , IFR = 3.1469 And CMR = 0.0088.*

*There is a tremendous increase in IFR and CMR from 1st of June to 30th of June and still continues to increase.*
